

MAHBOD MOGHADAM

Software Support Specialist

Rasht, Iran | mahbodapachii@gmail.com | t.me/mahbod_moghadam | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Support Specialist with hands-on experience troubleshooting software, operating systems, and legacy infrastructure. Skilled at diagnosing root causes of system instability, performance issues, and compatibility conflicts, and at communicating technical solutions clearly to non-technical users. Proven ability to plan and validate infrastructure changes — including legacy database and OS migration testing — with measurable outcomes and formal recognition from a government organization.

CORE SKILLS

- Software Support: installation & configuration, updates & maintenance, error troubleshooting, compatibility resolution
- Operating System Support: installation & setup, configuration, update/upgrade support, boot & startup troubleshooting
- System Troubleshooting & Optimization: performance diagnostics, driver/compatibility fixes, storage & resource management, system cleanup
- System Upgrades: OS/software/driver upgrades, compatibility checks, post-upgrade testing
- Infrastructure: VPN deployment & management, virtual private server administration, VMware Workstation test environments
- User Support: remote support via AnyDesk, clear technical communication, step-by-step guidance

PROFESSIONAL EXPERIENCE

Freelance IT Support & Systems Specialist

Self-employed — Rasht, Iran

2017 – Present

- Deployed and maintained VPN services on virtual private servers using open-source management panels.
- Diagnosed and resolved software, operating system, driver, network, and performance issues for business clients.
- Delivered contract-based on-site technical support through one-day service engagements for photography studios, companies, and computer service shops, including OS upgrades, system cleanup, and performance optimization.
- Provided remote technical support via AnyDesk and similar remote-desktop tools.

IT & Software Support Specialist — Compulsory Military Service

General Directorate of Cooperatives, Labour and Social Welfare of Gilan Province

2 years

- Supported department-level software (e.g., Unemployment Insurance and Labor Inspection systems) connected to a shared organizational server.
- Identified a critical compatibility conflict between a legacy SQL Server 2000 database and Windows 7 that was blocking antivirus deployment and causing server instability and slow application performance.
- Designed and executed a migration test using VMware Workstation, moving the database to a modern Windows Server environment while validating compatibility against real production data.
- Authored complete technical documentation of the process and results; received formal recognition and a certificate of appreciation for the initiative.
